Fiscal contact 1 (required)

Name:_____

Gatorlink ID:_____

Phone:_____

Email:_____

Fiscal Contact 2

Name:_____

Gatorlink ID:_____

Phone:_____

Email:_____

Important note about using grants:

If you are planning on using Funds 201 or 209 for these purchases you must make sure that the expiration date of the grant does not exceed the service end date. C&G will not allow us to process charges on these two funds that go beyond the expiration date listed in PeopleSoft on the grant. If you know that your grant has an extension that will cover services beyond the end date or has any other special circumstances you must first get C&G's approval, provide us with documentation of the approval and then we will be able to process the invoice against these funds. Here is a link providing more guidance on using Grant and Contract funds for our services; https://www.rc.ufl.edu/research/proposal-support/guide-using-grant-and-contract-funds/

The UFIT Business Center has consolidated Research Computing (RC) billing into the central UFIT billing system. This will require your fiscal office to use the MyUF Market Form for Research Computing to provide us with the chartfield string for billing these services against in PeopleSoft. Someone from the IT Business Center will be contacting you with additional instructions on how to set this up once a service is requested. If you have any billing questions, please contact it-bc-ufitbill@mail.ufl.edu.

Requested Charges:

RC Service	UFIT code	Qty	Amount	Total	Length	Note
Normalized Compute Cores	RC-NCU		$200
